## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-26, 33-40, drawn to an antibody and method of killing a cell.

Group II, claim(s) 27-32, drawn to nucleic acids, expression cassettes.

Group III, claim(s) 41, drawn to a method of identifying a polypeptide.

Group IV, claim(s) 42-50, drawn to a method of making a library.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Two different products are presented in Group I and II. These two products do not share a common core structure, nor common property or activity. The products listed in Groups I and II are directed to a family of products and a family of nucleic acids such that there is no one to one correspondence (see example 17 of PCT Administrative Instruction, Annex B). Groups III and IV are methods of using products of Groups I and II and the methods are distinct such that the antibody can be used in a

materially different method such as in Group I and the nucleic acid can be used in a materially different method such as to screen for mutations. Thus the inventions I-IV are patentably distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different searches in the patent literature, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Larry R. Helms, Ph.D., whose telephone number is (703) 306-5879. The examiner can normally be reached on Monday through Friday from 7:00 am to 4:30 pm, with alternate Fridays off. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, can be reached on (703) 308-3995. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
